SUMMER HEAT IS RADIANT HEAT **RENSHADE** STOPS RADIANT HEAT

RENSHADE is aluminium foil which has been perforated to allow light to penetrate but not the heat. The result is quite startling – the product eliminates the discomfort of excessive heat and glare yet provides gentle filtered light.

RENSHADE – VELCRO TO GLASS

Can be fastened to the inside of glass by velcro spots and later removed until the next hot period, or left in place for winter benefits.

RENSHADE HOLLAND BLINDS

When made into Holland Blinds, **RENSHADE** makes the perfect barrier to intense summer heat and glare. Simply pull down the **RENSHADE** blind in the morning and let up when the sun has gone.

RENSHADE does not block out light – view outside can still be seen through blinds.

RENSHADE will also prevent loss of heat through windows in winter.

RENSHADE gives greater comfort and substantial lowering of cooling & heating costs in summer & winter.

RENSHADE in roll form is also ideal to go under polycarbonate roofs which can be very uncomfortable on hot days. For new pergolas, lay **RENSHADE** on top of rafters under roofing. For existing patios/pergolas etc where the heat and glare is unbearable, simply staple **RENSHADE** to the underside of rafters or purlins.

RENSHADE has many applications, such as windows, under polycarbonate roofing, skylights, car windscreens etc; anywhere there is a problem with radiant heat.

		<u>+ GST</u>
Rolls	1350mm x 5m = \$88.00 per roll	\$96.80
	1350mm x 10m = \$176.00 per roll	\$193.60
	1350mm x 20m = \$352.00 per roll	\$387.20
